GPA: 5.123

PROJECTS

ACM Projects CookAlong, Association for Computing Machinery   Sept. 2020 – Nov. 2020
- Developed a culinary website that utilizes voice commands to guide users step by step through ingredients and instructions in order to prepare a dish without constant device handling
- Implemented Web Speech API for speech functionalities through React web-framework and Ruby on Rails server-side framework.
- Established versatile speech commands through transitioning from Google Cloud API to Web API
- Utilized git and GitHub to enhance fluid team communication and feature development remotely

TOBOR'S TREASURE TROPH, HackUTD GameJam 2020   Oct. 2020
- Developed a 3D adventure and puzzle game for users to explore UTD campus and play puzzles
- Built and modeled player map and puzzles through Unity Game Engine
- Led development in player design modeling and controls, implementing 3rd person functionalities
- Guided team in utilizing GitHub with Unity projects to ensure timely delivery of MVP
